

General catalogue

Hydraulic components, drive couplings, oil tanks

COMPONENTS FOR THE HYDRAULIC AND DRIVE TECHNOLOGY

HBE's success is based on highest technical quality standards, comprehensive advice and reliable customer service. With a history of more than 35 years on the market, HBE has established itself as one of the leading manufacturers of components for fluid and drive technology. In addition to steel and aluminium oil tanks, the company's portfolio includes shaft and flange couplings as well as an extensive range of top quality hydraulic components.

Our love of craftsmanship binds things together. This applies not only to the manufacture of oil tanks in our in-house steel construction department, but also to our communication with our customers. In addition to an extensive selection of series-produced items that are always in stock, a large proportion of our products are manufactured to order.

Customer-oriented flexibility when implementing special requests is a matter of course for us, and is a feature of HBE that our customers have come to depend on over many years. From accessories for all aspects of pump and motor use to a ready-to-fit hydraulic tank – we can supply the complete package to our diverse product range.

Today, HBE products are used by well-known companies from all sectors of mechanical and plant engineering.

They appreciate the short lead time that we can offer thanks to optimised warehousing, as well as the high quality.

With own subsidiaries in Italy, France, Great Britain, USA, China and India along with sales partners in all important industrial countries worldwide, we operate close to the customer. To ensure our quality standards for all our sales offices, HBE employees are being continuously trained.

We have regular audits by accredited certification authorities. TÜV Nord certifies that our company complies with the standards ISO 9001:2015 (quality management), ISO 14001:2015 (environmental management), ISO 45001:2018 (health and safety management) and ISO 50001:2018 (energy management). In addition, our steel department is certified according to DIN EN ISO 3834-2 and EN 1090-2. In accordance with DIN EN 1090, the processes of all welding methods used in-house are also certified. The corresponding qualification certificates (WPQR) according to DIN EN ISO 15614-1 are available for both normal and stainless steel.

The current publication of this catalogue supersedes all information from previous publications. HBE reserves the right to make changes and substitutions. HBE is not liable for any printing errors. Reproduction, including excerpts, is permitted only after written approval by HBE. Last revised: 09/2024

OIL TANKS WELDED STEEL

SERVICE RANGE

- Approved welding shop according to DIN EN 1090 (part 1-3)
- Welding certificates available at www.hbe-hydraulics.com
- Approved shop according to § 19 I, WHG (Federal Water Act)
- Leak test with certificate on request
- Welding constructions and welded blanks
- Machining of normal steel S235JR (St37) or stainless steel 1.4301 (V2A) resp. 1.4571 (V4A)
- Reliable delivery periods and high quality standard

TANKS ACCORDING TO CUSTOMER SPECIFICATION

- Tanks ready for mounting, oil sumps and welding constructions according to customer specifications
- Up to 20,000 litres resp. 6.4 tons
- Welded blanks and sandblastings
- Material S235JR (St37)
- Stainless steel 1.4301 (V2A) resp. 1.4571 (V4A), glass bead blasted inside and outside

Tanks according to customer drawing
up to 20,000 litres resp. 6.4 tons

OIL TANKS WELDED STEEL

TANKS ACCORDING TO CUSTOMER SPECIFICATION

Special tank 250 L with cover
S235 JR, powder-coated

Special tank 2.300 L incl. additional tank
S235 JR, primed

Special tank 500 L with oil sump
S235 JR, painted

Special tank 2.500 L with base frame
S235 JR, painted

Special tank 2.200 L
1.4571, glass bead blasted

Special tank 1.400 L
1.4301, glass bead blasted

OIL TANKS WELDED STEEL

PRODUCT DESCRIPTION

- Material S235JR (St37)
- Sandblasted and grounded inside and outside, resistant to hydraulic oil on mineral oil base
- Leak detection with dye penetrant test
- Gasket 15 x 5 mm made of perbunan (NBR) in case of screwed tank lid
- Drain plug DIN 908 + Cu gasket for oil drain at the tank

AVAILABLE FOR EXTRA CHARGE

- Comprehensive range of HBE accessories, such as cleaning covers, gaskets, oil level gauges, fillers etc.
- Individual machining of lids
- Final varnish
- Primary coating resistant to special media (please see resistance table page 15)
- Stainless steel 1.4301 (V2A) resp. 1.4571 (V4A), glass bead blasted inside and outside
- Tightness certificate

SERIES WLST

PRODUCT DESCRIPTION

- Weldless tanks produced by the deep drawing process
- Guarantee a 100% tightness
- High stability and weldless structure
- Thus, the tanks meet highest demands of various hydraulic applications
- Low weights are minimising freight costs
- Epoxy powder coating in RAL 7011 (iron grey) for a high level surface protection and an aesthetic appearance
- Delivery content (standard): NBR lid gasket, blank steel lid, drain plug, bores for level indicator and welded steel feet
- On request: individual machining of tank lids for extra charge
- Specially designed lid gaskets prevent leakage oil dripping down
- Vibration damping characteristics
- Short lead times due to stocking of tank sizes

OIL TANKS CASTED ALUMINIUM

PRODUCT DESCRIPTION

- Low freight costs and space saving storage due to stackability
- Stable casted body with good heat dissipation by material aluminium and all-round fluting
- From AB 12 with feet and from size AB 44 optional with castors
- Flat gasket between tank lid and tank made of paperboard or rubber cork for AB 3,5 – AB 20
- Toroidal sealing ring (endless, without contact spot) 6 mm ø NBR for AB 30 – AB 70
- On request, all sizes with bores for oil level gauge
- On request, individual lid machining available at short notice

CLEANING COVERS

PRODUCT DESCRIPTION

- For a safe closure of inspection openings
- Mounting via flange or central assembling
- Types RD 250-4 and RD 250/235 for steel oil tanks of low size
- Types RD 350 and RD 475 acc. to DIN 24339
- Test pressure for all RD types max. 0.5 bar
- O-ring and form gasket available in perbunan (NBR standard), viton (FPM) and EPDM
- Material: aluminium
- All cleaning covers with flange assembling also available in steel or VA
- Version „W“ with sight glass made of polycarbonate
- All aluminium cleaning covers also available with customised company logo

LEVEL OIL GAUGES

SCALE PLATE VERSION

- Optical / thermal monitoring of the liquid level in the tanks
- 4 sizes from 76 mm up to 254 mm
- Suitable for hydraulic fluids HL and HLP
- Gaskets made of perbunan (NBR standard) or Viton® (FKM)
- Steel housing - powder coated
- Plug & sight glass made of PA
- Scale plate made of PVC
- Optional version with thermometer

TECHNICAL DATA

Temperature range of medium: $-20^{\circ}\text{C} \dots +80^{\circ}\text{C}$

Indication range probe thermometer:

0°C up to $+100^{\circ}\text{C}$

Tank pressure: max. 1 bar

Screw torque: max. 8 Nm

ELECTRICAL CONNECTIONS / FUNCTIONS

Contact load:

max. 10 W (type C)

max. 5 W (type O)

Switching voltage: 50 VAC / DC

Switching current: 0.25 A

Electrical switch with PG9:

Protection class IP 65, connection 3 not in use

LEVEL SWITCHES

PRODUCT DESCRIPTION

- Electrical level monitoring
- Suitable for mineral oils, diesel and benzine, as well as for water
- Electrical circuit for level min. / max.
- Standard version level max. = contact open
- Contact pipe: brass
- Float switch: nylon
- Max. temp: 80°C
- Protection class: IP 65
- Hysteresis: 2 – 3 mm
- Max. voltage: 250 V AC
- Max. switch current: level 1 A
- Power AC/DC: level 80 W/VA

VERSION WITH 1 SWITCH CONTACT

- Optional with additional temperature monitoring:
1 switch contact level / 1 switch contact temperature
- Electrical circuit
for temperature < 70°C = contact closed
- Power AC/DC: temperature 10 W/VA

Order code		
Type	Length	Option
NS1-NO	200	TE70° NC

VERSION WITH 2 SWITCH CONTACTS

- Electrical level monitoring with 2 float switches

Order code		
Type	Length	Distance
NS2-NO	300	105

VERSION WITH VARIABLE SWITCH CONTACTS

- Adjustable length by cutting the contact pipe to the required length
- Contact pipe: Indox aisi 304
- Float switch: NBR
- Contact type: Reed
- Power AC/DC: level 50 W/VA

Order code

DESICCANT BREATHERS

PRODUCT DESCRIPTION

- Tank breathing, humidity absorption and cleaning of the inflowing air in one unit
- Refillable with separately available desiccant "EG"
- Easy disposal of desiccant in the household waste
- No content of any hazardous material acc. to EG directive 99/45/EC and 2001/60/EC
- Easy capacity control of the desiccant by colour changing from red to orange
- Easy replacement of the air filter cartridge
- Reduction of oxidation inside the hydraulic system
- Service life extension of oil and machinery
- Available incl. adapter plates "A" and dust indicator "VA"

Order code

ACCESSORIES

DUST INDICATOR "VA"

- Is being mounted on the adapter plate
- Displays the contamination level of the air filter
- After changing the air filter cartridge, the dust indicator is reusable by pressing the RESET button

ADAPTER PLATE "A"

- Allows a direct mounting on existing connections
- Connection possibilities for dust indicator as well as suction and return lines
- Material: plastics
- Plug, O-ring and Allen screws are included

DESICCANT BREATHERS

DIMENSIONS AND TECHNICAL DATA

MATERIALS

- Inner tube: stainless steel
- Body: SAN (Styrol Acrylnitril)
- Desiccant: ZR gel (3 – 6 mm)

FLUID COMPABILITY

- Mineral oil: OK
- H, HL, HLP, HVLP: OK
- HEES (Synt. Ester): OK

For other fluids please contact HBE

VR IMMERSION HEATERS WITH MAGNETIC CLAMP

PRODUCT DESCRIPTION

- Pre-heating of the medium by direct heating
- Stable welded version
- Easy installation
- No lateral tank machining
- Low minimum oil level in horizontal position
- Pick up of iron particles with integrated magnetic clamps
- Protection class IP 68
- Integrated thermostat with switch-off temperature +40°C (other temperatures on request)
- Integrated temperature limiter, wired for direct switching
- 3 pole, 4 mtr. long cable with screwed cable gland M16
- Temperature resistant up to -20°C
- Medium touched pieces made of stainless steel 1.4571 (protection tubes), brass (cable gland) and plastics (cable)
- Resistant against HLP and HFA fluids, diesel, heating and vegetable oil (for other fluids, e.g. HFC, please contact HBE)

Order code				
Art. No.	Type	Power		Surface charge
1962	VR	1,000 W	/	1.2-M

DIMENSIONS

ASSEMBLY INFORMATION

- Fixing of the heater by magnetic clamps either horizontally at the tank bottom or vertically at the tank wall
- Do not hang up the heater at the cable
- Lead the cable outside above oil level and fix it at the lid or tank with screwed cable gland M16
- Tank heater must be covered by at least 50 mm of the medium
- A retro-fitting requires an opening in the tank lid of Ø 70 mm

Art. No.	Type	Power [W]	L [mm]	Voltage [V]	Surface charge [W/cm ²]

SCREWED-IN HEATERS

PRODUCT DESCRIPTION

- Heater for pre-heating of hydraulic oil on mineral oil base
- For horizontal mounting under oil level
- Surface charge approx. 1.5 W/cm^2 for hydraulic oils
- Bright galvanised steel cap
- Material: steel (further materials on request)
- Wiring schemes for various supply voltages on request

SERIES PTHK 90

- Exchangeable ceramic heating insert (mounting / dismounting possible without oil drain)
- Protection class IP 65

Series PTHK 90

SERIES PTHK 92

- Exchangeable ceramic heating insert (mounting / dismounting possible without oil drain)
- Temperature control for internal (THI) or external (THA) regulation, single pole 0 – 85°C, 16 ampere
- Protection class IP 54 for THA resp. IP 65 for THI

Series PTHK 92

SERIES RHK - G1 1/2"

- Protection class IP 65

Series RHK - G 1 1/2"

SERIES RHK - G1 1/2" THA / THI

- Temperature control for internal (THI) or external (THA) regulation, single pole 0 - 85°C, 16 ampere
- Protection class IP 54 for THA resp. IP 65 for THI

Series RHK - G 1 1/2" THA / THI

SERIES WHK G 1 1/2"

- Mounting via tank lid
- Protection class IP 65
- Optional with temperature control for internal regulation (THI)

REQUIRED DETAILS FOR QUOTATION

In order to provide you a specific quotation, we need the following information:

- Power
- Max. immersion length
- Voltage
- Surface load
- Thermostat yes / no

For the calculation of the tank heater, you will find a questionnaire and selection programme in the down-load section of our website www.hbe-hydraulics.com.

OIL PRE-HEATER EDH

PRODUCT DESCRIPTION

- For the pre-heating of hydraulic oil, heating oil or other hard-inflammable agents
- The fluid to be heated is lead through a heating element bundle with the aid of baffles
- With pre-determined minimum flow rate a sufficient flow velocity is reached
- Thus, the carbonisation temperature is avoided

PRODUCT FEATURES

- The mounting position is either vertically or horizontally. Vertically: Provide electrical connection on top.
- Heating capacity 0 - 90 kW
- Thermostat: 0 – 90°C (without EDH-500)
- Temperature limiter at 100°C (without EDH-500)

RECOMMENDATIONS

- Installation of a flow control
- Avoid after-heating effect / Make sure that baffles are cooled down (let the medium flow further for app. 15 min after device is turned off)

OPTION

- Surface charge: 1 W/cm²
- Water and water mixtures
- Temperature regulation (without EDH-500)

TECHNICAL DATA

Caution: Incorrect installation can lead to damage to the oil pre-heater.

Maximum operating pressure = 16 bar

Higher operating pressures on request

Operating temperature = 0 – 95°C

Size	Heating capacity [kW]	Surface charge [W/cm ²]	Minimum oil flow [l/min]	Recommended oil flow [l/min]	Thermostat [°C]	Differential [K]
EDH - 500	0.5 – 3	0.8 – 2	1	5	–	–
EDH - 700	2.5 – 5	1 – 2	20	30	0 – 90	2
EDH - 1000	5 – 10	1 – 2	40	50	0 – 90	2
EDH - 1200	7.5 – 30	1 – 2	60	75	0 – 90	2
EDH - 1700	22.5 – 90	1 – 2	80	100	0 – 90	2

For media with a viscosity of more than 1000 cSt., a surface charge of 1 W/cm² is recommended.

OIL PRE-HEATER EDH

HEATING POWER (kW) IN RELATION OF FLOW RATE AND DESIRED TEMPERATURE INCREASE

Depending on the type of oil, small tolerances are possible.
(Please consider the minimum flow rates of the selected device.)

BELLHOUSINGS AND ACCESSORIES

CONTENT

Rigid bellhousings	80
Damped bellhousings	82
Bellhousings for rectangular pump connections	84
Rectangular bellhousings with damping flange	88
Rectangular bellhousings for Honda motors	89
Bellhousings for NEMA motors	90
Cast iron bellhousings	92
Foot flanges	94
Damping elements	97
Mounting flanges	102
Gaskets for bellhousings	103
Bellhousings with oil cooler (PTÖK)	104

ROUND BELLHOUSINGS AND ACCESSORIES

PRODUCT DESCRIPTION

- Connection elements for centring between electric motor and hydraulic pump
- For all hydraulic pumps available at short notice
- Both mounting sides are finished
- Horizontal and vertical application possible
- Material: aluminium
- Other materials on request; please also see page 92

RIGID BELLHOUSINGS

ACC. TO VDMA 24561 FORM A

- Space saving storage due to stackability

Order code rigid bell housings					
Type	Size		Length		Boring
PR	250	/	124	/	433/1

BELLHOUSINGS WITH DAMPING FLANGE

ACC. TO VDMA 24561 FORM B

- Reduction of noise level of the pump / motor unit up to 8 dB (A) possible, depending on pump construction
- Standard bellhousing made of aluminium, damping flanges made of aluminium / perbunan vulcanised
- No metallic connection
- Resistance: mineral oil max. 80°C

Order code bell housings with damping flange						
Type	Size		Length		Size DF	Boring
PR	450	/	234	/	DF 300	...

BELLHOUSINGS FOR RECTANGULAR PUMP CONNECTIONS

- For all common external gear pumps
- Also available with damping flange, please see page 88

Order code bell housings for rectangular pump connections					
Type	Size		Length		Boring
PE (PRE)	250	/	115	/	20

Our selection software for a precise bellhousing design is available free of charge here:

RECTANGULAR BELLHOUSINGS WITH DAMPING FLANGE DF-ZRP

PRODUCT DESCRIPTION

- Reduction of noise level of the pump / motor unit up to 5 dB (A) possible, depending on pump construction
- Standard bellhousing made of aluminium, damping flange made of aluminium / perbunan vulcanised
- No metallic connection
- Horizontal and vertical application possible
- Resistance: mineral oil max. 80°C

ORDERING EXAMPLE: DETERMINATION OF THE TOTAL LENGTH OF THE BELLHOUSING MOTOR 213-215 TC

pwL = Total length of the pump shaft incl. centring collar + possible difference, if coupling hub is longer than the carrying length of the pump shaft.

pwL (length of pump shaft) e.g.	= 50 mm
mwL (total length of motor shaft) e.g.	= 79.4 mm
E (distance between motor and pump shaft type 28/38)	= 20 mm
Total length theoretical L	= 149.4 mm
Total length available L	= 153 mm

BELLHOUSINGS IN CAST IRON OR STEEL

PRODUCT DESCRIPTION

- Bellhousings made of cast iron, steel or stainless steel according to VDMA standard 24561
- Motor and pump side fully finished
- Types PRG and PRGS primed, machined surfaces preserved
- Use for mining, offshore, mobile and most of heavy duty applications
- Type PRGS particularly adapted to servo motors with square flange suitable for highly dynamic drives
- Good damping features due to large mass
- High corrosion protection also against salt water
- Type PRST also available in stainless steel and in almost all special lengths

LIGHT TYPE PTFL

PRODUCT DESCRIPTION

- PTFL: light and space saving type design
- Reduce the storage of E-motors to only one version in case of horizontal and vertical construction
- Use with horizontal installation of B5 motors
- Material: aluminium (D)
- Suitable damping rods on page 99
- All types available from stock

HEAVY TYPE PTFS

PRODUCT DESCRIPTION

- PTFS: heavy type especially suitable for multiple pumps
- Reduce the storage of E-motors to only one version in case of horizontal and vertical construction
- Use with horizontal installation of B5 motors
- Material: aluminium (D)
- Suitable damping rods on page 99
- All types available from stock

The fastener is not present at PTFS200, PTFS250 and PTFS300

DAMPING ELEMENTS

DAMPING RODS

- Reduce the sound level and dampen vibrations
- Finished for IEC motors IMB 35 (MDS), NEMA motors, PTFE foot brackets (PTFL-DS) and PTFS foot brackets (PTFS-DS)
- Available from stock
- Special lengths and designs possible on request
- Material: Rubber (NR) / steel

Order code damping rods	
Type	Size
MDS	225 M

DAMPING FLANGES

- HBE damping flanges are applied in connection with HBE bellhousings or pump brackets between hydraulic pumps and E-motors
- They consist of two aluminium components, which are connected to each other by a moulded-on rubber coating (perbunan-NBR) without metallic contact
- The materials applied are resistant to mineral oils and are suitable for working temperatures up to + 80°C, temporary +100°C
- For optimisation, two different shore hardnesses are available: S = standard H = hard

Order code damping flanges		
Type	Size	Pump face code
DF	250	586/1

DAMPING RINGS

- For application between bellhousing and tank vertically or horizontally
- Damping rings consist of two vulcanised perbunan coated combined aluminium rings
- Application: mineral oil up to max. +80°C
- Noise reduction: approx. 3 – 5 dB (A)
- Sealing lips moulded-on, no additional sealing necessary

Exemplary illustration of a breakaway quick-closing device

MOUNTING FLANGES

PRODUCT DESCRIPTION

- Mounting flanges enable the assembly / disassembly of the power unit including pressure line without dismounting of the cleaning cover
- Pressure lines are led through the mounting flange
- Material: ST 37
- Suitable for bellhousings $\varnothing 160 - 400$ mm
- Gaskets made of GK (rubber cork) available as accessory

GASKETS FOR BELLHOUSINGS AND GEAR PUMPS

PRODUCT DESCRIPTION

- D gaskets are applied between bellhousing and cleaning cover and also between bellhousing and MF mounting flange
- D gaskets made of rubber cork (GK)
- PD gaskets are applied between pump and bellhousing
- PD gaskets made of paperboard (P)
- All gaskets are available from stock

BELLHOUSING WITH INTEGRATED OIL COOLER

PRODUCT DESCRIPTION

- Series PTÖK: bellhousing with oil air cooler
- Model series for electric motors 0.55 – 22 kW (IMB 5/IMB 35/IMV 1)
- Noise reduced design, form B
- Cooling capacity 0.95 – 5.15 kW
- 4 model series available (ø200 – ø350)
- All bellhousing lengths comply with VDMA 24561
- The standard bellhousing can be replaced easily with a bellhousing with oil cooler at any time due to identical installation lengths
- Horizontal – IMB 5/IMB 35 – and vertical – IMV 1 – use possible
- Foot flanges type PTFL and PTFS mountable acc. to VDMA 24561

Order code							
Type	Size		Length		Ø Fan wheel		Pump face code
PTÖK	250	/	120	/	LR28	/	20

TECHNICAL ADVANTAGES

- High cooling capacity with low noise output on the smallest installation space
- Suitable as reflux or leak oil cooler
- Requires no electrical installation
- Easy to maintain due to simple installation and removal of the cooling element
- Due to standard damping, reduction of noise level up to 6 dB (A) possible

TECHNICAL DATA

Operating pressure:	16 bar
Load change:	1 x 10 ⁶ , f = 2 Hz
Testing pressure:	25 bar static according to DIN 50104

BELLHOUSING WITH INTEGRATED OIL COOLER

COOLING CAPACITY

Type	Cooling capacity ⁽¹⁾ P [kW] $\Delta t = 40 \text{ K}$	Power E-motor ⁽³⁾ [kW]	Air flow [m ³ / h]	Input power [W]	Noise level ⁽²⁾ [dB (A)]	Correlation cooling and motor power %
PTÖK 200	0.95	0.55 – 1.5	72	20	52	63 – 100
PTÖK 250	2.1	2.2 – 4	260	30	58	53 – 95
PTÖK 300	3.22	5.5 – 7.5	430	90	69	43 – 59
PTÖK 350	5.15	11 – 22	780	140	70	23 – 46

⁽¹⁾ The indicated capacity relates to the nominal rotation for the driven machine and is 1,500 min⁻¹. In case of different speeds, please contact HBE.

⁽²⁾ Noise levels of damped version with bellhousing and electric motor are measured with 1 m distance to the tested objects. The stated values of noise level will be various depending on the electric motor.

⁽³⁾ Direction of pump rotation always clockwise (looking on pump shaft)

Should no additional heat sources have an effect on the hydraulic aggregate between 30 and 40 percent of the engine output is lost as heat energy when the engine is operated at an average efficiency. A part of this heat is released outwards from the individual components. Above all, the surface area of the tank plays an important role here. However, some heat energy remains which may lead to overheating of the oil. In order to avoid this, the usage of an additional cooler is required. In the vast majority of cases, a cooling capacity of between 20 to 30 percent of the engine output is sufficient – also with aggregates with a smaller tank surface area.

Meanwhile, it is hard to imagine oil hydraulics without bellhousing coolers. They are simple to install, they require very little space – particularly due to the ventilation system no longer being required – and, in most applications, achieve the complete required cooling capacity. See figure 1.

The values from figure 1 apply for an optimal amount of oil flow and applies to one Δt from 40 K. Should the oil flow be notably low or not sufficiently continual, the installation of a separate cooling circuit could be necessary – even this is effortlessly convertible with PTÖK bellhousing coolers. Figure 1 shows the dependency of the cooling capacity with the amount of oil flow. You will achieve the actual cooling capacity by multiplying the values for 1K Δt with the relevant Δt .

Fig. 1

Specific cooling capacity $P / \Delta t$ depending on oil flow Q and temperature difference $\Delta t = 1 \text{ K}$ (oil inlet to air inlet).

OIL AIR COOLER FOR INDUSTRIAL OPERATION

SERIES ACI

PRODUCT FEATURES

- Noise level reduction due to axial fan blades of the latest design
- Streamlined fan housing for optimisation of the air flow
- Air fins insensitive to contamination
- Static test pressure 25 bar according to DIN 50104
- Peak pressure resistance at 16 bar and 1×10^6 load cycles, $f = 1\text{ Hz}$
- Operating pressure: 16 bar
- Max. operating temperature: 120°C
- Powder-coated housing
- Drive motor: 230 - 400V, 50Hz (DC version 12/24V on request)
- Operation with all common hydraulic fluids of different viscosities (oil, HFA, HFC, etc.)
- Cooling block also available in 2-way design or with internal bypass-valve on request

MATERIALS

Component	Material	Surface
Cooler block	Aluminum	powder-coated according to RAL 9006
Fan housing	Steel	powder-coated according to RAL 7012
Axial-fan	Plastic (PAG)/Aluminium	
Protection grid	Steel	galvanized
Mounting feet	Steel	powder-coated according to RAL 7012

COOLING CAPACITY

The specific cooling capacity indicated in the graph was determined on the test bench, test oil ISO VG 46, oil-inlet temperature 60°C. The actual cooling capacity may deviate by approx. $\pm 5\%$ depending on the installation site and other operating parameters.

PRESSURE DROP

CONVERSION FACTORS VISCOSITY

The correction factor has to be used for the calculation of the pressure drop for other viscosities:

$$\Delta p_{\text{Oil}} = \Delta p_{46\text{cSt}} \times f$$

$\Delta p_{46\text{cSt}}$ as indicated in the graph.

Viscosity	Factor
ISO VG 22	0.7
ISO VG 32	0.8
ISO VG 46	1
ISO VG 68	1.2
ISO VG 100	1.5
ISO VG 150	1.7
ISO VG 220	2
ISO VG 320	2.5
ISO VG 460	2.9

CALCULATION OF COOLER SELECTION

EXAMPLE 1:

Cooling capacity known

Cooling capacity $P = 65 \text{ kW}$
Oil inlet temperature $T_{\text{Oil}} = 70^\circ\text{C}$
Ambient temperature $T_{\text{Air}} = 20^\circ\text{C}$
Oil flow $Q_{\text{Oil}} = 300 \text{ l/min}$

$$\begin{aligned}\text{Specific cooling capacity: } & \frac{P}{T_{\text{Oil}} - T_{\text{Air}}} \\ &= \frac{65 \text{ kW}}{70^\circ\text{C} - 20^\circ\text{C}} \\ &= 1300 \text{ W/K}\end{aligned}$$

SELECTION OF COOLER TYPE:

ACI-61-400-4

CALCULATION OF TEMPERATURE DIFFERENCE:

$$\begin{aligned}\Delta T_{\text{Oil}} &= \frac{36 \times P}{Q_{\text{Oil}}} \\ &= \frac{36 \times 65 \text{ kW}}{300 \text{ l/min}} \\ &= 7.8 \text{ K}\end{aligned}$$

EXAMPLE 2:

Cooling capacity unknown

The heat transfer to the oil is approx. 30% of the motor power (diesel/electric motor)

Motor power $P_{\text{Motor}} = 45 \text{ kW}$
Cooling capacity $P = 13.5 \text{ kW}$
Oil inlet temperature $T_{\text{Oil}} = 50^\circ\text{C}$
Ambient temperature $T_{\text{Air}} = 20^\circ\text{C}$
Oil flow $Q_{\text{Oil}} = 200 \text{ l/min}$

$$\begin{aligned}\text{Specific cooling capacity: } & \frac{P}{T_{\text{Oil}} - T_{\text{Air}}} \\ &= \frac{13.5 \text{ kW}}{50^\circ\text{C} - 20^\circ\text{C}} \\ &= 450 \text{ W/K}\end{aligned}$$

SELECTION OF COOLER TYPE:

ACI-31-400-4

INSTALLATION INSTRUCTIONS

If possible, the heat exchanger should be integrated into the system with suitable hydraulic hoses. In the case of rigid piping, compensators are one way of eliminating introduction of forces via the piping.

Pressure peaks in the system can lead to fatigue failure of the heat exchanger, even if they are below the permissible operating pressure. The frequency of the peaks is the influencing variable.

PARTIAL FLOW COOLER UNIT FOR INDUSTRIAL USE

SERIES ACIP

PRODUCT DESCRIPTION

The new cooler system ACIP is optimised for a wide range of hydraulic applications. An integrated motor pump unit makes it possible to cool the oil efficiently and continuously in a separate circuit. The cooling process is working independently from the operation condition of the main hydraulic power unit.

PRODUCT FEATURES

- Oil-air cooler ACI with motor & pump in one unit
 - Drive motor 230/400 V, 50 Hz, 1450 min⁻¹
 - Gear pump, operating pressure: 4 bar
 - Bellhousing and coupling
- Continuous cooling process
- Permissible viscosity range: 10 - 300 mm²/s
- Max. operating temperature 90°C
- Max. suction height 1 m

BENEFITS

- Easy to retrofit in existing systems
- Extension of oil life due to permanent cooling
- Extended service life of seals and hydraulic components
- High flexibility in the choice of the pump
- Short delivery times by intelligent warehousing

OIL-AIR COOLER FOR MOBILE APPLICATIONS

SERIES ACM

PRODUCT DESCRIPTION

The new ACM oil-air cooler series is an optimised heat exchanger for a wide range of hydraulic applications. The 12/24V DC drive enables the use in mobile hydraulic power units, e.g. in agriculture/ forestry, in construction and mining machinery and in the loading and transport sector.

PRODUCT FEATURES

- Compact fans with 12/24V DC drive
- Protection class IP68
- Operating pressure: max. 15 bar
- Operating temperature: max. 120°C
- Displacement: 10 - 300 l/min
- Cooling capacity: 3 - 50kW (referring to $\Delta T=40K$)

BENEFITS

- Different sizes and cooling capacities depending on the application
- Internal bypass valve
- Short delivery times by intelligent warehousing

DOC® BRAZED PLATE HEAT EXCHANGER

PRODUCT FEATURES

- High operating pressures
- High operating temperatures
- Compact connection blocks, brazed on the plate heat exchanger
- Cooling capacity of 5 to 360 kW
- Suitable for most industrial hydraulic applications
- Sturdy design due to brazed contact points between the plates
- This allows best possible resistance against high operating pressures
- 32 bar for DOC® 16, 30 and 60, 16 bar for DOC® 20 and 110
- Brazed design allows temperatures of up to 225°C
- Sturdy connection blocks allow high fastening torques for assembling

OPERATING PRINCIPLE

The heating surface consists of thin corrugated brazed stainless steel plates. Channels are formed between the plates; which are connected in a way so that the two media flow through the channels in counter-current flow.

The media are kept in the unit by a brazed seal around the edge of the plates. The contact points of the plates are also brazed to withstand the pressure of the handled media.

STANDARD VERSION

The plate pack is covered by the cover plates. The connections are located in the front cover plate. The channel plates are corrugated to improve the heat transfer efficiency and to increase the mechanical strength.

STANDARD MATERIALS

Cover plates:	Stainless steel Alloy 304 (1.4301)
Connections:	Stainless steel Alloy 304 (1.4301)
Plates:	Stainless steel Alloy 316 (1.4401)
Solder:	Copper

REQUIRED DETAILS FOR QUOTATION

In order to provide you with a specific quotation, we need the following information:

- Required flow rates
- Temperature programme
- Physical characteristics of the media used
- Desired working pressure
- Maximum permitted pressure drop

For the calculation of a plate heat exchanger, you will find a questionnaire in the download section of our website.

HIGHEST COOLING CAPACITY AND LOW DEGREE OF CONTAMINATION

- Low pressure drop over the connectors
- Optimised plate design
- Compact dimensions, low water consumption and low Delta T
- Highly efficient heat transfer due to turbulent flow (high k value; $P=k \cdot A \cdot \Delta T$)
- Self cleaning effect inside the cooler due to equally distributed and highly turbulent flow

The figure only refers to DOC 16 or DOC 20.

THE DIAGRAM

- is based on an oil temperature of 60°C and water temperature of 20°C. For an oil temperature of 50°C, multiply with the correction factor of 0.7. For other water temperatures, please see the correction factors on the right side.
- is calculated for two different oil / water flow rates: 2:1 and 4:1. This means that for every litre of oil circulated through the oil cooler, a minimum of 0.5 litres (2:1) or 0.25 litres (4:1) of water must be circulated to agree with the data in the diagram.
- is based on oil (ISO VG 32). For other oils, correction factors must be used. Multiply the required cooling load by the cooling load correction factor. After selecting the oil cooler, multiply the pressure drop by the pressure drop correction factor.

CORRECTION FACTORS

Water temperature [°C]	Correction factors
15	0.91
20	1.00
25	1.12
30	1.20
35	1.50

OIL / WATER COOLER FOR INDUSTRIAL USE

SERIES EKM/SKM

PRODUCT DESCRIPTION

- Development of a tube bundle heat exchanger
- For a wide range of industrial applications
- Additional cooling surface due to aluminium fins for a heat exchange capacity of 1,000 kW
- EKM/SKM heat exchangers have a cooling surface of 0.43 m² to 56 m²
- Are constructed of 43 basic units, available as single, double or quadruple version

PRODUCT FEATURES

- Aluminium fins and copper nickel tubes (standard) ensure maximum level of heat exchange
- Large oil connectors for minimum flow resistance
- Heat dissipation up to 1,000 kW
- Oil flow rates of up to 1,200 l/min
- Removable end caps for easy cleaning of the tubes
- Flanges allow a 90° rotation of the heat exchanger
- Optionally available with internal bypass check valve (patented)
- High quality materials
- Max. pressure: oil 35 bar / water 16 bar

OPTION

- Sea water version
- Certification for marine applications
- Compressed air application
- Water-water application
- Stainless steel version or chemically nickel plated

MATERIALS

- Shell, mounting bracket, baffles, tube sheet: steel
- End plates: steel
- Cooling fins, type plate: aluminium
- Tubes: copper, copper nickel
- End caps: cast iron
- Gaskets: nitrile rubber, cellulose fibre

PERFORMANCE DATA EKM 500 – 1000

1 PASS, TYPE: "O"

The performance data shown in the diagram are limited by the flow rate and may be exceeded after consultation with the manufacturer. The performance data shown is based on a water inlet temperature of 25°C and an oil outlet temperature of 50°C, together with an oil viscosity of 20.6 cSt.

PERFORMANCE DATA SKM 1700

2 PASS

The performance data shown in the diagram are limited by the flow rate and may be exceeded after consultation with the manufacturer. The performance data shown is based on a water inlet temperature of 25°C and an oil outlet temperature of 50°C, together with an oil viscosity of 20.6 cSt.

- 1 EKM-1718-T-CN
- 2 EKM-1724-T-CN
- 3 EKM-1730-T-CN
- 4 EKM-1736-T-CN
- 5 EKM-1742-T-CN
- 6 EKM-1748-T-CN
- 7 EKM-1754-T-CN
- 8 EKM-1760-T-CN
- 9 EKM-1766-T-CN
- 10 EKM-1778-T-CN
- 11 EKM-1784-T-CN

CALCULATION EXAMPLE EKM/SKM

For deviating oil outlet temperatures, water inlet temperatures and viscosities, the calculation has to be made as follows:

GIVEN VALUES

Heat to be dissipated (AW)	= 17 kW
Oil flow (V)	= 80 l/min
Oil outlet temperature ($t_{oil\ out}$)	= 45°C
Water inlet temperature ($t_{water\ in}$)	= 25°C
Oil type	= ISO 68
Effective heat to be dissipated	= kW eff.

1. The viscosity correction factor is calculated as follows:

Temperature difference ΔT (°C) =

$$\frac{AW\ (kW) \times 34.1}{Q\ (l/min)} = 7.2$$

Average oil temperature (°C) =

$$\frac{t_{oil\ out} + \Delta t + t_{oil\ out}}{2} = 49^\circ\ C$$

2. From oil manufacturer's data for ISO 68:

Viscosity at 49°C = 38 cSt

3. From viscosity correction table "A":

38 cSt = 1.11

AW eff. =

AW (kW) x 25 x viscosity (cSt) Tab. A

$$= \frac{t_{oil\ out} (^\circ C) - t_{water\ in} (^\circ C)}{20} = \frac{17 \times 25 \times 1.11}{20} = 23.6\ kW$$

From oil/water 2:1 performance diagram at an oil flow of 80 l/min and 23.6 kW, the outcome is:

Cooler no. 31 = EKM- 714 -T
-CN

COOLER SELECTION

The performance data shown is based on a water inlet temperature of 25°C and an oil outlet temperature of 50°C, together with an oil viscosity of 20.6 cSt. For different viscosities, the correction factor "A" can be read in the diagram above.

OIL / WATER COOLERS

SERIES UKC-G

PRODUCT DESCRIPTION

- Efficient cooling capacity
- Cooling surface of 0.15 m² to 0.43 m²
- Especially compact

PRODUCT FEATURES

- Application for mounting in tank or gear box
- Easy installation in existing threaded connections for tank heaters
- Cost effective, space saving solution
- End cap: G 1/2" water connections
- Cooling capacity depending on circulation of cooling tubes in the tank or gear box

DELIVERY CONTENT

- Cooler with end cap, screws and O-ring

OPTION

- Special lengths on request

TECHNICAL DATA

Maximum operating pressure: = 10 bar

Maximum operating temperature: = 95 °C

Maximum flow rate tubeside:

Copper tubes = 15 l/min

Copper nickel tubes = 25 l/min

Stainless steel tubes = 25 l/min

MATERIALS

	Standard
Thread	Brass
Tubes	Copper, copper nickel or stainless steel
Baffles	Steel
End caps	Cast iron
Gaskets	Nitrile rubber

SOFTEX® ELASTIC COUPLINGS

SOFTEX® COUPLINGS

- Torsionally flexible, maintenance free, good dynamic properties
- Vibration reducing
- Axially pluggable
- Compact design / low flywheel effects
- Different elastomer hardnesses of the spiders
- Finish bores with keyway, taper (1:5/1:8), and tothing
- Hub materials: aluminium, cast iron, spheroidal cast iron, sintered steel and steel
- ATEX certification
- Basic programme (please see page 158) available from stock
- Special machining on request

Order code SOFTEX® COUPLINGS							
Coupling type	Size	Hub	Bore	Hub	Bore	Hub material	Spider
SOFTEX®	38/45	B	Ø 38	A	N/2	Alu	92°

SOFTEX® FA COUPLINGS

- Flange hubs for heavy machinery
- All sizes are available unmachined or ready for assembly
- 2 flanges can be combined or FA flange with standard Softex® hub
- Material: cast iron

Order code SOFTEX® FA couplings		
Coupling type	Size	Hub
SOFTEX®	42/55	FA

SOFTEX® TL COUPLINGS

- For all driving applications in the mechanical engineering
- Friction-locked, detachable shafts / hub connections
- Coupling combination TL 1/1; TL 2/2 and TL 1/2 possible
- Coupling hubs TL 2 axially separable
- Application with all standard taper bushes

125 / 145	60	340	4.6	1.3	0.60

¹ at speed of 1,500 1/min

The specified values are guide values and are based on the nominal torque T_{KN} , the speed and the ambient temperature of +30°C.

In case of axial misalignments, the factors "E" and "L" are the max. values.

When mounting the coupling, dimension "E" must be set exactly in order to keep the coupling axially flexible.

In case of additional angular and radial displacement, the values should be used pro rata. The misalignment values are depending on speed and performance.

The stability of the coupling will be increased by careful alignment of the shafts.

Assembly instruction available in the download section of our webpage www.hbe-hydraulics.com

Shock factor S_A/S_L	Slight starting shock				1.5
	Medium starting shock				1.8
	Heavy starting shock				2.2

Coupling selection*

$$T_N = T_{KN} \times K1 \times K2 \times K3$$

*The largest possible torque T_N should be used as a basis. The catalogue torque T_{KN} has to be multiplied with all safety factors. For drives with dangerous torsional vibrations, the critical speed must be considered.

SOFTEX® ES NO BACKLASH COUPLINGS

PRODUCT DESCRIPTION

- Under initial tension no backlash shaft connection
- Triple axially pluggable version
- Simple blind mounting, no time-consuming screwings
- Small structural dimensions – low flywheel effects
- Maintenance free, simple optical test
- Different elastomer hardnesses of the spiders
- Available for all common shaft dimensions
- Finish bores with ISO standard H7, (clamping hub F7), keyway from $\varnothing 6$ acc. to DIN 6885 sheet 1-JS9
- Hub materials: aluminium up to size 38/45, steel for larger sizes

HUB TYPES

1. 0 Type 1.0 with keyway and fixing screw  • Positive transmission • Permissible torque depending on permissible surface pressure • Not suitable for backlash-free power transmission for heavily reversing operation	1. 1 Type 1.1 without keyway with fixing screw  • Non-positive locking torque transmission • Suitable for a backlash transmission of very low torques
2. 0 Type 2.0 slotted once without keyway  • Frictional, backlash shaft-hub-connection • Transmissible torques depending on bore diameter • Up to size 19/24	2. 1 Type 2.1 slotted once with keyway  • Positive transmission with additional frictional connection • Due to frictional connection a reverse backlash is prevented resp. reduced • Surface pressure of the keyway connection is reduced
2. 5 Type 2.5 slotted twice without keyway  • Frictional, backlash shaft-hub-connection • Transmissible torques depending on bore diameter • From size 24/30	2. 6 Type 2.6 slotted twice with keyway  • Positive transmission with additional frictional connection • Due to frictional connection a reverse backlash is prevented resp. reduced • Surface pressure of the keyway connection is reduced

SOFTEX® ES NO BACKLASH COUPLINGS (6.0 / 6.0P)

TYPE 6.0

- Zero backlash shaft connection under high friction torque
- For Servo motor applications such as main spindle drives of tooling machines and heavy load of presses
- No imbalances of keyways or slotted clamping elements
- Smooth running with good stability even at 40 m/s peripheral speed
- Also suitable for ATEX explosion protection applications (when considering the selection in accordance with the influence of high friction torques)
- Easy assembly by internal clamping screws
- ISO fit H7 up to $\varnothing$ 50 mm and ISO fit G7 over $\varnothing$ 50 mm
- Materials: Hub = aluminium / clamping ring = steel, both also available in steel S355J2

Order code type 6.0						
Coupling type	Size	Bore	Type	Bore	Type	Spider
SOFTEX® ES	28	28H7	6.0	25H7	6.0	98°

TYPE 6.0P

- High precision, zero backlash shaft connection under high friction torque
- Developed for high speed short and multi spindles for tooling machines (DIN 69002)
- Smooth running with good stability even at 75 m/s peripheral speed
- Also suitable for ATEX explosion protection applications (when considering the selection in accordance with the influence of high friction torques)
- Easy assembly by internal clamping screws
- Spiders with 98° SH A or 64° SH D incl. bore required
- ISO fit H6
- Hub and clamping ring made of 42CrMo4

- In case of higher speeds a dynamic balancing of the hubs is required.
- The length dimension L is increased by the indicated Δ ka values.
- The specified misalignment values are general guide values.

- In case of current angular and radial misalignment the indicated values can only be utilised proportionately.
- In case of a temperature increase the permissible torques and the max. permissible radial and angular misalignment values must be multiplied by the temperature factor St.

*Complete coupling type 1.0 with medium bore on both sides

Temperature	-25°C < +30°C	+30°C < +40°C	+40°C < +60°C	+60°C < +80°C
Temperature factor St	1.0	1.2	1.4	1.8

Characteristics	92° Shore A		98° Shore A	64° Shore D
Colour	 			
Material	Polyurethane		Polyurethane	Hytrel
Permissible temperature range	-40°C up to +90°C		-30°C up to +90°C	-50°C up to +120°C
Permissible temperature peaks	-50°C up to +120°C		-40°C up to +120°C	-60°C up to +150°C
Applications	Servo drives, positioning drives, main spindle drives, planetary gears, no backlash gears

Starex® FL-PA – flexible flange coupling	179

STAREX® FLEXIBLE COUPLINGS

- Double cardanic curved tooth gear coupling
- Application in mechanical engineering and hydraulics
- Compensation of misalignment of shaft axial-radial-angular
- Axially pluggable - simple mounting
- Hub material: steel
- Sleeve material: polyamide
- Finish bore with keyway, cone and tothing
- Basic programme available from stock, please see page 178

STAREX® FL-PA FLEXIBLE FLANGE COUPLINGS

- Torsionally rigid, positive coupling for diesel engine drives of hydraulic pumps
- Short installation lengths
- Simple plug-in installation of hub and flange without aligning tools
- Maintenance free due to combination of materials plastics / steel
- High mechanical stability and temperature resistance up to +130°C due to fibre-glass reinforced polyamide flange
- For all hydrostatic drive of construction machines, harvesters and forest machineries

¹⁾ Finish bores acc. to ISO standard H7, keyway acc. to DIN 6885, sheet 1-JS99

²⁾ Weights refer to max. $\varnothing d$ without keyway.

When mounting the coupling, dimension "E" must be set exactly.

The stability of the coupling will be increased by careful alignment of the shafts.

Corresponding pump mounting plates can be found in chapter "flange couplings", page 185

A high-contrast, black and white photograph showing a close-up of a metal flange coupling. The coupling is a circular metal ring with a central threaded hole, mounted on a shaft. The background is a blurred, textured surface, possibly a metal plate or another part of the machinery. The lighting creates strong highlights and shadows, emphasizing the metallic texture and the circular form of the coupling.

FBA FLANGE COUPLING

PRODUCT DESCRIPTION

- Elastic coupling for the connection of gas or diesel motors and hydraulic pumps
- Steel flange with integrated pump hub and neoprene mounted screw connections
- Simple blind mounting due to one piece design
- Damping and vibration absorbing characteristics
- Temperature resistance up to +100°C
- SAE flywheel sizes 6 1/2" up to 14" available
- Typical applications: aerial lifts, skid steer loader, excavators and low mass compressors

Order code FBA flange couplings			
Coupling type	Size		Bore
FBA	14	-	SAE 16/32 x15Z

TECHNICAL DATA

Flywheel size	Nominal torque T_{KN}
	[Nm]
6 1/2	220
7 1/2	220
8	410
10	525
11 1/2	840
14	1370

MISALIGNMENT VALUES

Angular misalignment = 1°

Parallel misalignment = 0.38 mm

NV FLANGE COUPLING

PRODUCT DESCRIPTION

- Elastic torsional coupling for the connection of gas or diesel motors and hydraulic pumps
- Cast iron flange with elastomer and intergrated pump hub
- Simple blind mounting due to one piece design
- Damping and vibration absorbing characteristics
- No lubrication or clamping of the pump hub is required

Flywheel size	Pitch circle	Outer diameter flange	Fixing bolts
Kubota Super Mini	130.00 mm	150.00 mm	5 x 8 mm
Kubota Super 5	100.00 mm	135.00 mm	3 x 10 mm

DELTA FLANGE COUPLING

PRODUCT DESCRIPTION

- Cost-effective flange coupling for drive of hydraulic pumps by combustion engines
- Glass fibre reinforced polyamide flange with intergrated hardened steel pump hub and rubber mounted screw connections
- Simple blind mounting due to one piece design
- Reduced wear of the shaft profile due to damping and vibration absorbing characteristics
- Temperature resistance -40°C up to +100°C
- For hydrostatic drives of construction machines, harvesters and forest machineries

*The torque values listed are for ambient temperatures. Torque capacities may be reduced at lower and higher temperatures. Please review the temperature service factors for the different temperature ranges.

**The Delta series is able to accommodate small angular, parallel and axial misalignments that are typical to shaft / flange connections. The Delta series is not recommended for applications with excessive misalignments.

PUMP MOUNTING HOUSINGS

PRODUCT DESCRIPTION

- To simplify the assembly of hydraulic pumps and diesel motors without SAE flywheel housing
- Exact positioning of motor and pump
- Available with all common pump connection configurations
- Combination with all flange couplings series FL-PA, FBA, Delta or NV possible
- Materials aluminium, EN-GJL-250 (GG25) or EN-GJS-400 (GGG40)

SELECTION SOFTWARE

SELECTION SOFTWARE

For the individual design of our ACI coolers we provide our customers with an easy to use online software. The three calculators enable a quick and safe calculation of the suitable bell housings, couplings, tank heaters and coolers.

HIGHLIGHTS

- Flexible display for PC, tablet or smartphone
- Runs in every modern web browser
- Login with your HBE customer number
- Access to all HBE calculation programs with one registration
- Guest access possible
- Simple user interface for quick value adjustments

P+ CALCULATOR

- Calculation of bell housings, couplings and accessories
- For more than 4,000 pumps from around 150 manufacturers
- For IEC, NEMA, combustion and servo motors
- ATEX approved products at just one click
- Specific data and prices already during project planning
- Product data as DXF, STP or PDF

HT CALCULATOR

- Calculation of heating performances
- Design of suitable tank heaters
- Approx. 100 different standard tank heaters on file

AC+ CALCULATOR

- Calculation of the required cooling capacity
- Design of suitable oil-air cooler
- Technical specification and dimension sheet as PDF download
